

# The Martin-Conquest Trike

## AT LONG LAST A 'RIDE FROM THE WHEELCHAIR' TRIKE FIT FOR A BIKER

I have lost count of the times we have been approached by individuals and companies who have decided that they are going to design and build a trike that can be ridden from a wheelchair.

Invariably the technical difficulties involved have proven too much and each project has failed before the first nut and bolt are put together. That is until now.....

**Introducing the Martin Conquest Trike. Europe's very first high performance trike that can be ridden from a wheelchair.**

Alan Martin and his team at Martin Conquest Ltd have come up with the goods in a most spectacular way. Over the past two years I have been a regular visitor at their workshop in Cheshire, advising them on various design aspects of their unique trike and I have been privileged to see Alan Martin's dream become a superb reality.

Initially the trike was based on the BMW R850 but the recent announcement from BMW that they are soon to stop production of that model has meant that the Martin Conquest Trike is now based on the BMW R1100.

For wheelchair user who have any difficulty in transferring from a wheelchair to a trike this machine opens up the biker's world of freedom and independence. Its sleek space-age design ensures that it is first and foremost a big sexy trike.

**I believe the Martin Conquest trike is the most exciting innovation of the past ten years for disabled motorcyclists.**

As with all forms of adapted bikes and trikes there is financial help available via the NABD grant scheme subject to the usual terms and conditions.

The standard retail price for the Conquest Trike is £21,500.00

**The standard features of this amazing machine include;**

6 forward gears plus a reverse mechanism. Automatic wheelchair access ramp. Security monitoring and tracking hardware. VDO Dayton single CD tuner with 30 radio presets. Metallic paint. Waterproof interior. Fold down passenger seat.

**Optional extras include:** Power steering, fully automatic clutch. customised paint & chrome schemes, various tracking and monitoring packages, satellite navigation, and parking sensors.

Deposits are being taken now for April, for further information you should contact:

**Martin Conquest Ltd, Unit 4, Mount Street, Hyde, SK14 1NS.** Telephone **0161 351 0324.**
