

Chris Rice's – BMW/Grinnall Trike

Chris Rice from North Wales has Spina Bifida resulting in very weak legs and no mobility in his feet.

His 1200cc BMW/Grinnall trike has been adapted to incorporate a hand-operated linked braking system.

An electric reverse has also been fitted which is operated from the black button on the right hand handle bar switch cluster.

The adaption work was carried out by Grinnall Specialist Cars of Worcestershire (01299 822862 – www.grinnallcars.com) with the help of a grant from the NABD.

Chris said: "I would like to say a huge thank you to NABD for the grant money towards this work.

It is amazing being back on a bike again and being part of the biker community."

This NABD grant of 1,000.00 was sponsored by donations from Bristol & Avon Roadrunners Mcc, The BMW Club (Mercia Section) & RAF Brize Norton.
