

# BMW R1150 RT Trike with Kliktronic Gearchanger in Gloucester

I have been riding motorcycles since I was 16 years of age and have owned all types of bikes from 175cc to my current 1150cc.

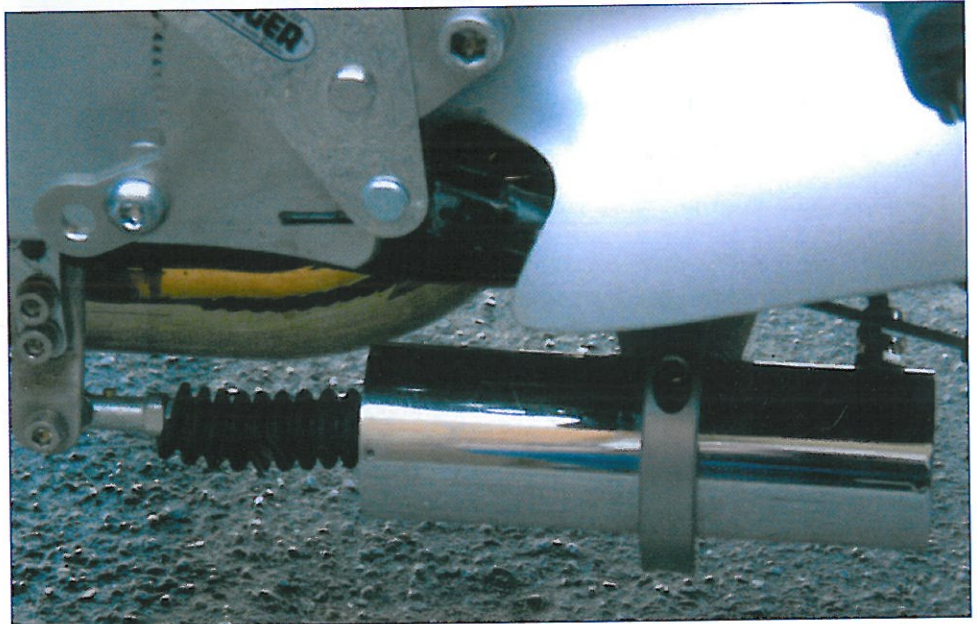

In 2006, I was diagnosed as having Parkinson's disease and it was affecting my left side and thus my gear lever foot.

I was then on the verge of selling my trusted motorcycle, when I heard about converting it into a trike and thus came across Kliktronic electrical gear actuators for changing gear, operated by push buttons.

I then realised that this would extend my life of motorcycling for several years and I could keep my pride and joy.

Thank you for your kind grant award.

*Alan Deacon*

This NABD grant of £609.00 was sponsored by a donation from Martin Brooks (sponsored body wax).
